

RichBuddy

RICHBUDDY

Autonomous Business Co-Pilot for Student Entrepreneurs

From scattered business data to verified, actionable decisions.
Built for student entrepreneurs who want to grow their businesses without sacrificing their studies.

DORMATHON 2026

Running a Student Business Shouldn't Feel Like a Second Degree

Student entrepreneurs face three challenges:

Scattered Data

Sales, expenses and orders are difficult to turn into useful insights.

Limited Time

Studying leaves little time for manual business analysis.

Unclear Next Steps

Knowing sales figures is not the same as knowing what action to take.

The real problem: Students don't just need more information. They need help turning business data into decisions they can actually execute.

Ramen

USER PERSONA & TARGET USER

Nana & Fara, 22

University Students I Campus Micro-Entrepreneurs

Run printing, ramen and food delivery services to survive university.

WHAT THEY NEED

- **Understand sales at a glance**
- **Find profitable products**
- **Get clear next steps without advanced analytics skills**

TARGET USERS

Student Entrepreneurs

University and college students running small businesses while studying.

Small Business Owners

Entrepreneurs and beginners with sales data but limited financial or analytical experience.

SOLUTION

MEET RichBuddy

1

One prompt.

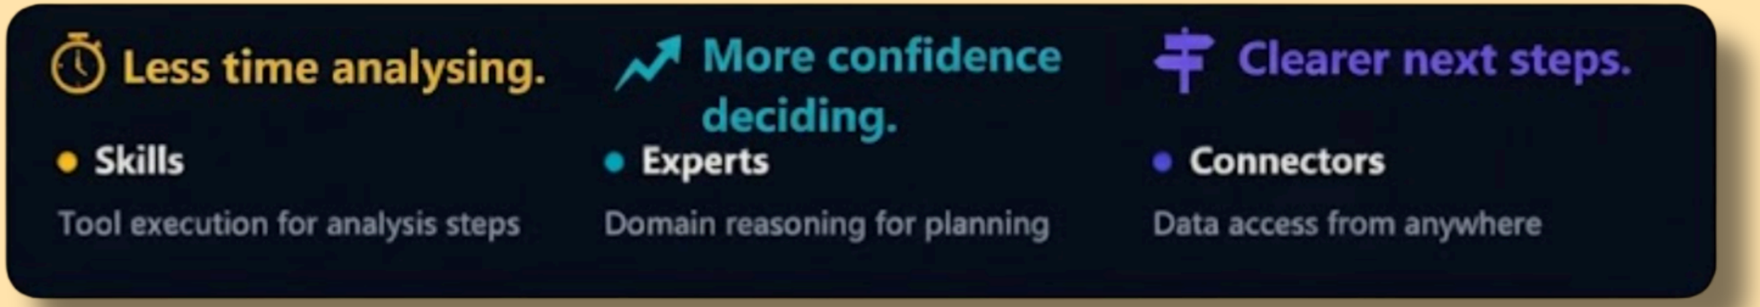

One goal.

End-to-end execution.

WHAT RichBuddy DOES

- Analyse sales, costs, profit and product performance.
- Identify important business opportunities using their data.
- Prioritise practical, student-friendly actions.
- Generate usable business reports and structured files.
- Validate its calculations and generated outputs.

OUR VALUE PROPOSITION

BUILT FOR STUDENT ENTREPRENEURS. DESIGNED FOR REAL EXECUTION.

Student-first

Supports small, practical businesses such as home-based food sellers, thrift shops, campus vendors and student freelancers.

Evidence-driven

Grounds findings and recommendations in available business data.

Task-oriented

Moves from a natural-language instruction towards completed work and deliverables.

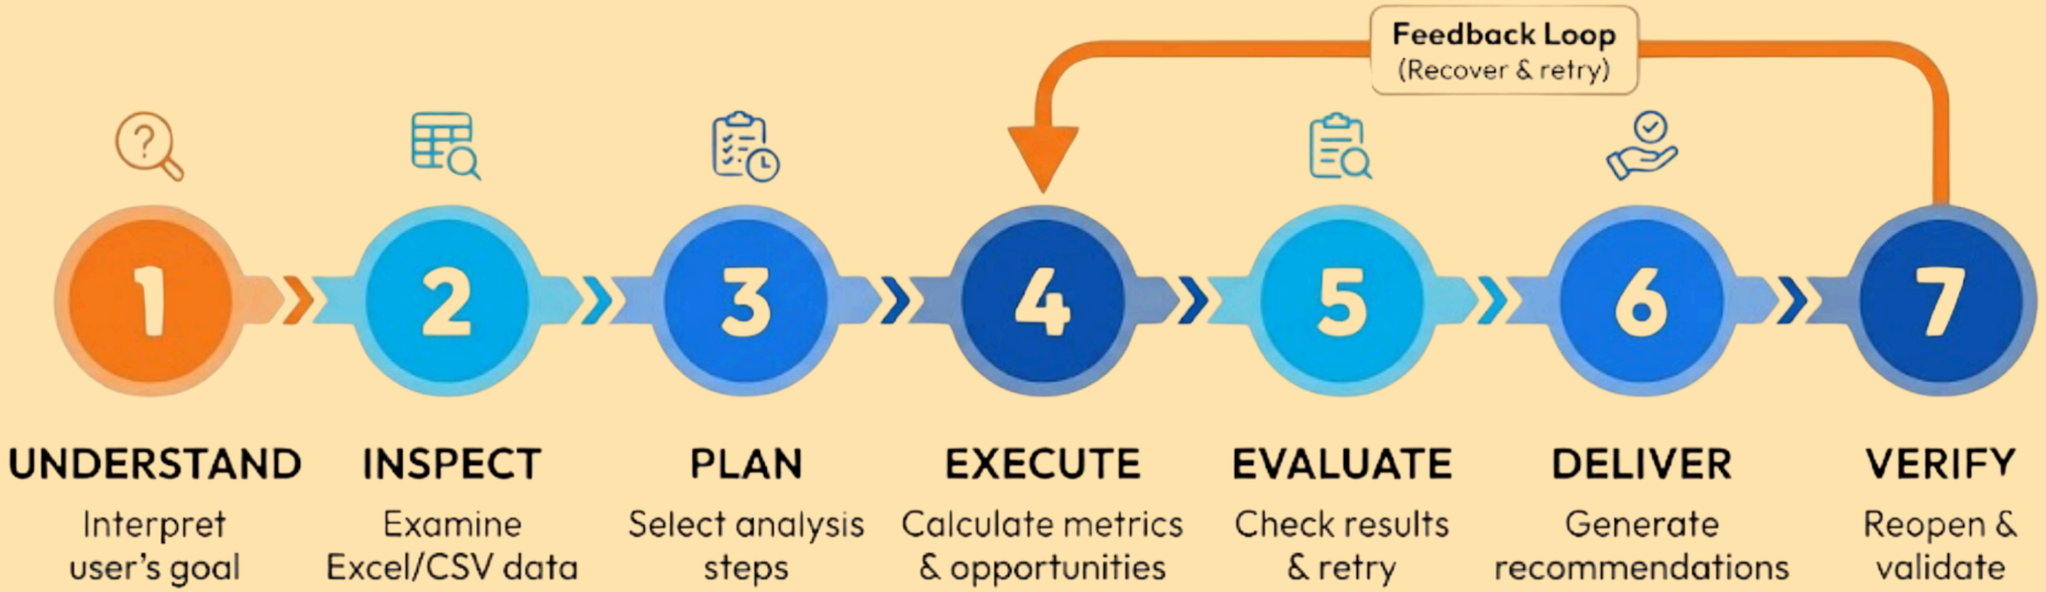

Verification-focused:

Checks outputs and reports execution status transparently.

RICHBUDDY — FROM BUSINESS DATA TO ACTION.

HOW IT WORKS

FROM ONE INSTRUCTION TO COMPLETED WORK

The difference: **RichBuddy aims to complete and check the task, not simply suggest what the user should do.**

FUTURE IMPROVEMENTS

Phase 1 is built. Phases 2 and 3 are proposed.

1

BUILT • NOW

Single prompt, multi source

Combines multiple Excel and CSV files and sheets in one run. Natural-language prompt to autonomous report.

2

PROPOSED

Multi-sheet. LLM-powered

Connects databases, CRMs and cloud storage. Automated recurring reports with LLM-written insights.

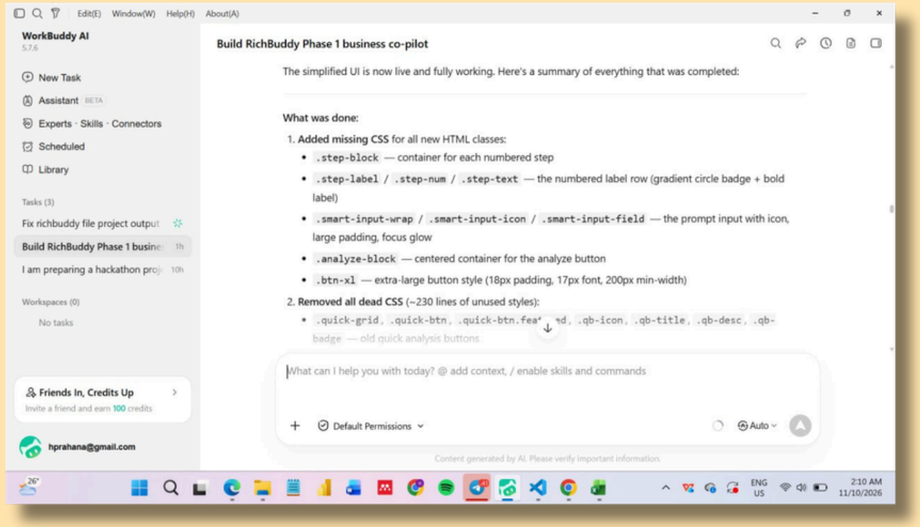

3

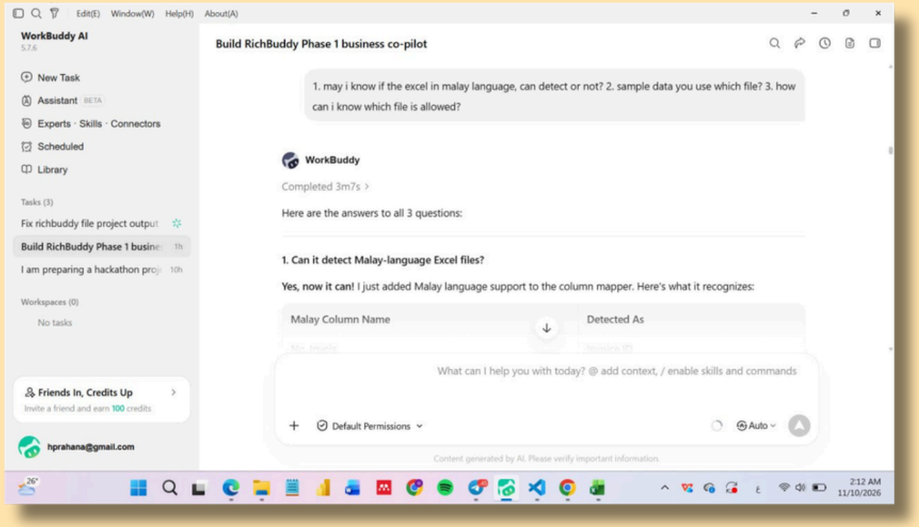

PROPOSED

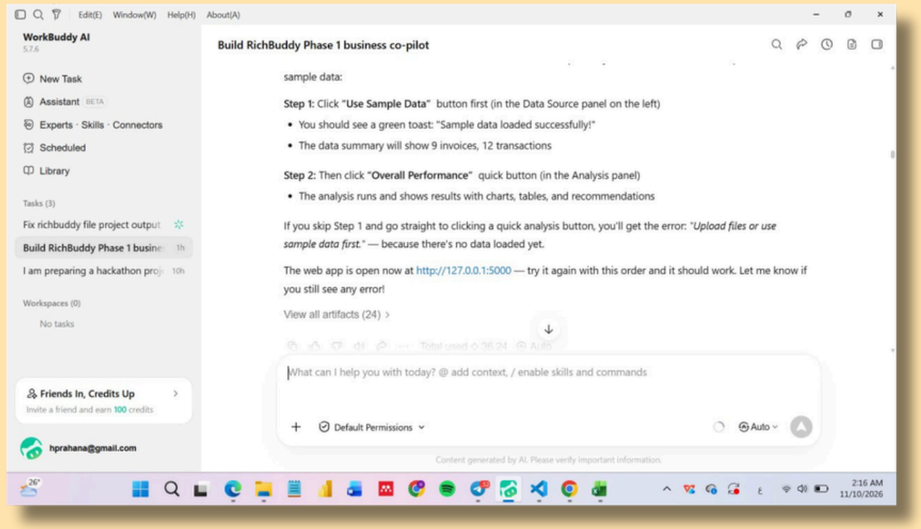

Multi-agent collaboration

Specialized agents for data, analysis, and narrative, with a checker agent for quality control. Users ask questions about their reports.
